

AI Security Code Reviewer

Executive Security Summary

Generated: 2025-06-22 22:48:46

Security Score: 3/100

Key Findings:

- Insecure Deserialization (Critical)
- Broken Authentication (High)
- SQL Injection (High)

Overall Assessment:

The code has several critical and high severity vulnerabilities related to authentication, SQL injection, and insecure deserialization. Immediate remediation is required to secure the application.
